How the Game Works: Core Mechanics

To genuinely master the skies, a gamer needs to initially comprehend the fundamental mechanics of the game. While specific functions can differ slightly depending upon the particular platform hosting the game, the universal structure stays consistent.

The Flight Phase

Once a round begins, the airplane takes off the runway and begins its ascent. As it climbs up, a multiplier counter starts ticking upward-- starting at 1.00 x and continuing to increase. The longer the flight continues without occurrence, the higher the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight course, various elements appear that can either increase the player's score or too soon end the run. These can include beneficial tailwinds, fuel boosts, storm clouds, or sudden

altitude drops.

Squandering

The defining mechanic of Avia Masters is the element of danger versus reward. Players should decide the optimum moment to "cash out" or secure their development. Wait too long, and an abrupt risk might crash the aircraft, resulting in a lost round. Cash out prematurely, and gamers might miss out on enormous multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the aircraft for launch. Place initial criteria or begin the round. **Climb** The aircraft takes off; multipliers begin to climb. Display the flight path and view the multiplier grow. **Mid-Flight** Browsing risks, gathering benefits, and evaluating danger. Decide whether to hang on or secure the current rating. **Resolution** The flight ends either through a successful cash-out or a crash. Gather benefits and prepare for the next round.
