What is Crazy Time?

What separates Crazy Time from standard table games is its high-energy television production value. Complete with dynamic studio sets, immersive sound style, and seamless combination of computer-generated images (CGI), players feel as though they have actually stepped onto the set of a high-stakes prime-time television show.

The Anatomy of the Wheel

The 54 sections of the Crazy Time wheel are divided into [bitz.io](#) numbers and bonus offer video games. Each area offers different payout capacities and probabilities.

Wheel Segment Payout/ Function Total Segments on Wheel Probability (%) **Number 1** Pays 1:1 21 38.89% **Number 2** Pays 2:1 13 24.07% **Number 5** Pays 5:1 7 12.96% **Number 10** Pays 10:1 4 7.41% **Coin Flip** Activates Bonus Round 4 7.41% **Cash Hunt** Sets Off Bonus Round 2 3.70% **Pachinko** Triggers Bonus Round 2 3.70% **Crazy Time** Triggers Bonus Round 1 1.85%

The Top Slot Feature: Adding Extra Spice

Before every spin of the primary wheel, a secondary two-reel slot device spins above the primary game. This is known as the **Top Slot**.

1. **Reel 1** displays among the betting sections (a number or a perk video game).
2. **Reel 2** displays a multiplier worth (varying from 2x approximately 50x).

If the randomly selected segment and multiplier align horizontally on the Top Slot, a multiplier is applied to that particular bet or perk round for the upcoming spin. If the wheel lands on that segment, all wins associated with it are multiplied appropriately, resulting in a few of the game's most outstanding payments.

The Four Immersive Bonus Rounds

The true heart of the Crazy Time experience depends on its 4 unique benefit rounds. Whenever the wheel arrive at a reward sector, participating gamers are carried to a brand-new mini-game, total with distinct mechanics and enormous multiplier potentials.

1. Coin Flip

- **Trigger:** Landing on the Coin Flip sector (4 areas on the wheel).
- **How it works:** A basic yet thrilling game of opportunity. A coin with a red side and a blue side is flipped by a mechanical flipper. Before the flip, random multipliers are assigned to both the red and blue results. Whichever side lands face up wins the appointed multiplier for the player.

2. Cash Hunt

- **Trigger:** Landing on the Cash Hunt sector (2 spots on the wheel).
- **How it works:** Players face a massive virtual screen featuring a grid of 108 random multipliers hidden behind shooting targets. A countdown begins, and gamers must use a virtual cannon to aim and shoot at a target of their choice. When time ends, all targets expose their surprise multipliers, and the player wins whatever worth their chosen target concealed.

3. Pachinko

- **Trigger:** Landing on the Pachinko sector (2 spots on the wheel).
- **How it works influenced by the standard Japanese arcade video game:** A glowing puck is dropped from the top of a large Pachinko wall filled with pegs. The puck bounces randomly down the board until it lands in one of the landing zones at the bottom, each containing a multiplier. If the puck arrive on a "DOUBLE" value, all multipliers at the bottom of the wall double, and the puck is dropped once again for even greater stakes.

4. Crazy Time

- **Trigger:** Landing on the Crazy Time section (just 1 area on the wheel).
- **How it works:** The crown jewel of the video game. The host opens a red door, leading players into a surreal, brightly colored virtual world featuring an enormous, 64-segment wheel.
- **The Process:**
 - Players must choose among three flippers (Green, Blue, or Yellow).
 - The host spins the huge wheel.
 - Whichever segment the picked flipper indicate when the wheel stops is the multiplier granted to the player.
 - Simply like Pachinko, if the wheel stops on "DOUBLE" or "TRIPLE," all multipliers on the wheel increase greatly, and the wheel spins again-- scaling as much as a maximum possible multiplier of 20,000 x.
