As displayed in the table above, the "High" risk setting implies that the vast bulk of drops will result in a loss (a multiplier of less than 1.0 x). However, the uncommon incident of the top-tier multiplier (often 1000x or greater) provides the capacity for substantial returns. Conversely, the "Low" danger setting guarantees that the ball often lands in a multiplier close to 1x, permitting a longer period of have fun with a smaller bankroll.
