When players do not know their opponent, analytical research studies show distinct propensities in the opening round:

- **Rock** is the most frequently thrown first gesture. Emotionally, players like to assert strength right out of the gate.
- **Paper** is the least typical opening toss.

The Counter-Strategy: Open your very first match with **Paper**. If your opponent follows human averages and throws Rock, you win instantly.

2. The Psychology of Losing (The "Win-Stay, Lose-Shift" Rule)

Behavioral economists have extensively studied how people react to winning and losing in Rock Paper Scissors. The most trusted behavioral pattern is referred to as **Win-Stay, Lose-Shift**:

- **If a gamer wins**, they tend to toss the very same gesture in the next round.
- **If a gamer loses**, they tend to move to the gesture that *would have beaten* their opponent in the previous round.

Example:

- *Round 1:* You play Rock, your challenger plays Scissors. **You win with Rock.**
- *Prediction for Round 2:* Your challenger lost with Scissors. Following the "Lose-Shift" rule, they will likely switch to Rock (due to the fact that Rock crushes Scissors, the move they simply lost with).
- *Your counter for Round 2:* Play **Paper** to beat their expected Rock.

3. Preventing Predictability

- **Mix it up:** Do not fall under a repetitive loop (e.g., Rock, Paper, Scissors, Rock ...).
- **Welcome randomness:** Try to clear your mind in between rounds to avoid emotional momentum wagering.
