Conventional table video games like blackjack and live roulette remain staples, however a new genre has stolen the spotlight: the live dealership video game show. At the outright apex of this trend sits **Crazy Time**, developed by Evolution Gaming.

Released in 2020, Crazy Time has actually caught the creativity of millions worldwide. This post provides a helpful, thorough look at Crazy Time, exploring its mechanics, benefit rounds, and why it has ended up being such a massive cultural phenomenon.

What is Crazy Time?

At its core, Crazy Time is a live online video game reveal constructed around a giant, vertically mounted financial wheel. A charming, live human host spins the wheel while interacting with players by means of a live chatroom. The main objective is easy: players position wagers on where they think the wheel will stop.

Nevertheless, the game is far more intricate than a [Crazy Time Free Play](#) standard carnival wheel. It integrates state-of-the-art video production, slot device mechanics, and immersive bonus offer video games that transport gamers into virtual worlds.

The Game Wheel Breakdown

The Crazy Time wheel features 54 sectors. Each segment represents either a number (1, 2, 5, or 10) or among four bonus offer video games. The frequency of each result on the wheel determines its payout capacity and possibility of landing.

Wheel Segment Payout/ Type Number of Segments on Wheel Likelihood (%) **1** 1 to 1 21 38.89% **2** 2 to 1 13 24.07% **5** 5 to 1 7 12.96% **10** 10 to 1 4 7.41% **Coin Flip** Reward Round 4 7.41% **Cash Hunt** Benefit Round 2 3.70% **Pachinko** Perk Round 2 3.70% **Crazy Time** Bonus offer Round 1 1.85%

As displayed in the table, standard numbers appear most frequently, providing lower payouts, while the desirable bonus rounds appear much less often but hold the potential for enormous multipliers.

The Top Slot: Adding Extra Spice

Before every spin of the main wheel, a two-reel slot maker positioned straight above the wheel spins at the same time.

- **Reel 1** displays among the wheel's wagering sections (numbers or benefit video games).
- **Reel 2** screens a multiplier (varying from 2x up to 50x).

If the symbol on Reel 1 matches the result of the primary wheel spin, the multiplier on Reel 2 is used to that win. If a bonus game is picked by both the Top Slot and the primary wheel, the base multipliers inside the perk round are instantly increased, setting the stage for potentially astronomical payouts.

Exploring the Four Exciting Bonus Rounds

The real heart and soul of Crazy Time are its four perk rounds. When the wheel stops on a bonus sector, gamers who positioned a wager on that segment are carried into a secondary game.

1. Coin Flip

- **Frequency:** 4 sections on the wheel
- **How it works:** An easy yet exhilarating video game of opportunity. A coin with a red side and a blue side is flipped immediately by a maker. Before the flip, 2 random multipliers are designated-- one to the red side and one to the blue side. Whichever side lands face up wins the appointed multiplier for the player.

2. Money Hunt

- **Frequency:** 2 sectors on the wheel
- **How it works:** Players deal with an enormous virtual screen featuring a grid of 108 random multipliers. These multipliers are then covered by various signs and mixed. 3. Pachinko

- **Frequency:** 2 segments on the wheel
- **How it works:** Inspired by the conventional Japanese arcade game, this benefit round features a large Pachinko wall filled with physical pegs. The host drops a puck from the top of the wall, and it bounces arbitrarily down through the pegs up until it lands in one of a number of multiplier zones at the bottom. If the puck lands in a "DOUBLE" zone, all multipliers at the bottom double, and the puck is dropped again.

4. Crazy Time

- **Frequency:** 1 segment on the wheel
- **How it works:** The ultimate bonus round. The host opens a red door, stepping behind it into an enormous, brilliantly colored virtual world including a massive, 64-segment wheel.
- Gamers need to pick one of 3 flappers (Green, Blue, or Yellow).
- The wheel is spun, and whatever multiplier the selected flapper indicate is awarded.
- Similar to Pachinko, if the wheel lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel boost, and the wheel is spun once again, as much as a maximum shocking multiplier limitation of 20,000 x.
