2. **View the Multiplier Rise:** As the round begins, a multiplier starts at 1.00 x and climbs up upward at an unpredictable rate.
3. **Squander:** Players should by hand strike the "Cash Out" button before the game suddenly "crashes."
4. **Win or Lose:** If a gamer squanders successfully, they win their original bet multiplied by the existing value. If the game crashes before they squander, the whole bet is lost.
