Secret Gameplay Mechanics

To be successful in Avia Masters, gamers should understand the foundational aspects that govern every flight. The gameplay revolves around an increasing multiplier system, fuel management, and environmental barriers.

1. The Multiplier Ascent

As soon as the airplane removes, a multiplier begins to tick up. The longer the flight continues without crashing, the greater the prospective payment or score. Nevertheless, waiting too long boosts the danger of a disastrous failure.

2. Fuel and Power-Ups

Flights are constrained by resources. Players must handle their fuel supply while actively gathering airborne bonus offers. These benefits can include:

- **Multiplier Boosts:** Instantly increase the current flight multiplier.
- **Fuel Refills:** Extend the period of the flight, permitting higher elevation gains.
- **Shields:** Provide short-lived resistance versus ecological dangers.

3. Environmental Hazards

The skies are not completely friendly. Gamers need to navigate wind shears, abrupt storms, and altitude-based barriers that can destabilize the aircraft.

Summary of Flight Elements

Aspect Description Impact on Gameplay **Beginning Multiplier** The standard value at takeoff (£ 1.0 x £). Sets the beginning point for development. **Fuel Gauge** Represents the remaining flight time. Dictates the length of time the aircraft can stay airborne. **Cloud Hazards** Turbulence zones experienced at greater altitudes. Can reduce speed or activate a crash if unshielded. **Bonus Orbs** Floating items that approve extra points or multipliers. Necessary for maximizing final flight ratings.
