

A garden brief should describe what you want to retain as clearly as what you want to change. Existing planting, open areas and familiar features can all be part of the starting point for a landscape conversation.

Make a retention list

Identify the items you want considered for retention and explain why they matter. Some may have a practical purpose while others have personal value. Use a photograph to identify the actual item. Avoid assuming that a general instruction to keep the garden character will tell another person which details you mean.

Separate preference from assessment

Explain your preference, then ask what the proposed work could mean for that feature. Its condition or suitability may need assessment before a decision is made. Record that uncertainty. Do not [R & G Almanza Landscape Inc landscape design chicago](#) describe a feature as suitable for reuse simply because keeping it is your first preference.

Check the proposal

Look for a description of what stays, what changes and which decisions remain open. Discuss protection and access arrangements around retained features. If a later change affects the retention list, update the written brief and proposal together so that an older sketch does not silently govern a different job.

R & G Almanza Landscape Inc provides landscaping and landscape design services.

Keep the next decision clear

Keep the practical arrangements close to the design notes. Access, retained features and later care can affect how the proposal is understood, even when they do not form its main illustration.

R & G Almanza Landscape Inc offers mulching.

R & G Almanza Landscape Inc offers seasonal cleanup.

R & G Almanza Landscape Inc is family-owned and has been in business since 1999.

Landscape project planning questions

What belongs in a landscape project brief?

Describe the area, its intended use, what you want to retain and the questions you want assessed.

How should proposals be compared?

Compare the work, preparation, selections and exclusions against the same brief before considering differences between totals.

What should inspiration photographs explain?

Label the particular arrangement or detail you like and discuss how that preference relates to the actual property.

How can unresolved choices be recorded?

Keep an explicit list of questions and identify what information is needed before each selection can be made.

What access questions should be discussed?

Describe entrances, gates and everyday routes, then ask which arrangements are relevant to the proposed work.

How should a staged project be discussed?

Ask what each stage includes, how the areas connect and the condition expected between stages.

How does maintenance fit into a design discussion?

Explain which care tasks you intend to arrange and ask what information accompanies the proposed work.

What should a revised proposal identify?

Record the affected area, the changed selection and which earlier assumptions still apply.

How can a lawn maintenance enquiry be clearer?

Name the lawn area and tasks under discussion, keeping observations separate from assumptions about their cause.

What should be kept at handoff?

Retain the current scope, agreed changes and care information, with outstanding questions identified separately.
