1. **Place the Bet:** The player chooses their wager amount utilizing their chosen cryptocurrency.
2. **Configure the Board:** The player chooses the variety of mines they desire to conceal on the grid (generally a standard 5x5 grid, amounting to 25 tiles). The more mines placed, the greater the prospective payment multiplier for each safe tile discovered.
3. **Discover Tiles:** The gamer clicks tiles one by one.
 - If a **star or gem** appears, the multiplier increases, and the player can choose to cash out or keep going.
 - If a **mine** appears, the round ends immediately, and the gamer loses their wager.
4. **Squander:** At any point during the safe streak, the player can click "Cash Out" to protect their payouts, including the increased crypto straight back to their casino balance.
