The Anatomy of the Crazy Time Wheel

Before placing any wagers, a gamer must comprehend the design of the wheel. The video game focuses on a massive, vertically mounted wheel divided into 54 segments. Each segment contains a specific payment number (1, 2, 5, or 10) or one of 4 perk game symbols (*Cash Hunt*, *Pachinko*, *Coin Flip*, and *Crazy Time*).

The distribution of these sectors is not uniform; lower-paying numbers appear much more regularly than the bonus rounds, [bitz.io](#) developing the risk-and-reward dynamic that specifies the video game.

Understanding the Betting Options

When gamers take a seat at a *Crazy Time* table, they are greeted by a digital wagering grid. They have a restricted window of time-- usually around 15 seconds-- to put chips on one, a number of, or all of the available betting areas.

To successfully bet Crazy Time, participants can divide their wagers into two primary categories: **Number Bets** and **Bonus Game Bets**.

1. Number Bets (1, 2, 5, 10)

- **Number 1:** The most typical sector on the wheel. It uses the lowest volatility and a 1:1 payment.
- **Number 2:** Offers a 2:1 payout and covers almost a quarter of the wheel.
- **Number 5 and Number 10:** These represent higher-risk, higher-reward number sections. They appear less often but provide much better returns when hit.

2. Perk Game Bets

The perk rounds are the main attraction of *Crazy Time*. To take part in a bonus offer round, a player needs to have an active bet put on that specific benefit sector. If the wheel lands on a perk game and the player has actually not put a bet on it, they can just see the other gamers win.

- **Coin Flip:** A simple 50/50 style mini-game including a red and blue coin with multipliers.
- **Pachinko:** A physical drop-board where a puck falls through pegs to land in a multiplier slot.
- **Cash Hunt:** A shooting gallery including 108 random multipliers concealed behind interactive targets.
- **Crazy Time:** The supreme benefit round, opening a virtual door to a gigantic secondary wheel with enormous multipliers as much as 20,000 x.

The Role of the Top Slot

Adding an extra layer of excitement to each and every single spin is the **Top Slot**. Located directly above the primary money wheel, this two-reel slot spins simultaneously with every round.

- The left reel selects a bet area (a number or a benefit game).
- The ideal reel selects a random multiplier (varying from 2x approximately 50x).

If the Top Slot successfully matches the winning segment on the main wheel, the multiplier is applied either to the winning number payout or to the multipliers inside the subsequent bonus game. This mechanic is important for those seeking to maximize their possible returns when they bet Crazy Time.
