

Use a wider photograph to show the tree, fence and space you want discussed. Explain whether your concern is clearance, access or the appearance of the area. Raise uncertainty about boundaries or permission before work is agreed rather than drawing a conclusion from the photograph.

Start with a clear question

Begin by stating what you want to understand, then add the observations that led to the enquiry. Keep preferences, reported changes and an assessor's later explanation distinguishable. This leaves room for a recommendation that differs from the first idea you had for the tree.

This tree-care planning guide from Progressive Tree Service focuses on branches beside a fence and the information needed to discuss it clearly.

The brief for a homeowner

Write the brief so it will still make sense after the initial conversation. Include the tree location, the reason for the enquiry and the surrounding area you want considered. Someone reviewing the proposal later should be able to connect each item with the same tree.

Questions to keep with the record

Which ownership or permission [tree service near me](#) questions need resolving before a scope is accepted? What information should accompany the first enquiry? Ask for an explanation that connects the answer with the particular tree and proposed work, then record anything still unresolved.

A practical next step

Send a short summary with the labelled record. If part of the situation is uncertain, identify the uncertainty and ask how it should be resolved.

Record the agreed limits of the work and leave unresolved boundary questions visible in the notes.

Keep the agreed work separate from ideas you are still considering for the rest of the garden.
