What is the Aviator Game?

Developed by Spribe, Aviator falls into the genre of "crash video games." The core property is brilliantly simple: a little red aircraft takes off, and as it climbs, a multiplier coefficient boosts. The airplane can fly away at any unpredictable second. The goal for the gamer is to put a bet, view the aircraft ascend, and money out their jackpots before the airplane unexpectedly flies off the screen.

If a player cashes out in time, they win their stake multiplied by the existing coefficient. If the aircraft flies away before they squander, the bet is lost.

2. **View the Takeoff:** The airplane removes, and the multiplier starts ticking up from 1.00 x.

1. The Single Bet vs. Double Bet Strategy

- **The Conservative Approach:** Place one bet and set the Auto Cash Out to a low multiplier (in between 1.20 x and 1.50 x). While the private wins are small, this technique yields a greater frequency of successful rounds.
- **The Balanced Approach:** Utilize the double bet function. Place a big stake on the very first bet with a low auto-cashout (e.g., 1.50 x) to cover the expense of both bets, and a little stake on the 2nd bet to go after higher multipliers (e.g., 5.00 x or higher).

2. Bankroll Management Rules

- **Set a Budget:** Decide how much money you want to invest before you start playing, and never go beyond that limit.
- **Never Chase Losses:** If you experience a losing streak, withstand the urge to increase your stake sizes to win the cash back quickly. This is the fastest method to deplete your account.
- **Accept Volatility:** The airplane can crash at 1.00 x consecutively. Never ever presume a high multiplier is "due" even if the last couple of rounds resulted in low multipliers. Each round is entirely independent.

Accountable Gaming in Kenya

The enjoyment of seeing the multiplier climb can be intoxicating, making it simple to misplace time and money. Responsible gaming is vital.
