How the Game Works: Core Mechanics

To truly master the skies, a player needs to first comprehend the fundamental mechanics of the game. While specific features can vary slightly depending on the particular platform hosting the game, the universal structure stays constant.

The Flight Phase

Once a round starts, the airplane takes off the runway and starts its ascent. As it climbs up, a multiplier counter begins ticking up-- beginning at 1.00 x and continuing to rise. The longer the flight continues without event, the higher the multiplier goes.

The Descent and Hazards

The skies are seldom clear. Along the flight path, different components appear that can either improve the gamer's rating or prematurely end the run. These can consist of beneficial tailwinds, fuel increases, storm clouds, or unexpected altitude drops.

Squandering

The defining mechanic of Avia Masters is the component of threat versus benefit. Gamers need to choose the optimum minute to "cash out" or protect their progress. Wait too long, and an unexpected hazard might crash the airplane, resulting in a lost round. Squander too early, and gamers might lose out on huge multipliers.

Game Phase Description Player Action **Pre-Flight** Setting stakes or preparing the aircraft for launch. Location preliminary criteria or start the round. **Climb** The plane removes; multipliers begin to climb. Monitor the flight course and view the multiplier grow. **Mid-Flight** Browsing hazards, gathering bonus offers, and evaluating threat. Decide whether to hang on or protect the present rating. **Resolution** The flight ends either through an effective cash-out or a crash. Gather benefits and get ready for the next round.

Features That Make Avia Masters Stand Out
