3. **Squander:** Players need to monitor the rising multiplier and click the **"Cash Out"** button before the airplane disappears off the screen.

Popular Strategies Used by Players

- **Bet 2:** Managed by hand, targeted at capturing a greater multiplier (e.g., 5x or 10x) for a revenue boost.

2. The Conservative Approach (Low Multiplier Hunting)

This technique involves cashing out consistently at very low multipliers (1.20 x - 1.30 x). While the private wins are small, the statistical possibility of the airplane crashing *before* 1.20 x is relatively lower, causing a higher win frequency. Nevertheless, a single crash before the target can eliminate several previous gains.

3. The Martingale Strategy (High Risk)

Adapted from roulette, this strategy involves doubling the bet size after every loss so that a single win recovers all previous losses plus a revenue.

- *Warning:* This method requires an enormous bankroll and can quickly hit table limits or deplete funds during a long losing streak.
