Look along almost any street in Cardiff and you will spot flat roofs on rear extensions, dormers and garages. They are practical and popular, but they also take a pounding from the rain and wind that roll in off the Atlantic, and heavy rain soon finds any weak point. Redland Roofing Cardiff is an independent, family-run roofing business that has served Cardiff and South East Wales for over 30 years, and flat roof repair and replacement is a big part of what we do from our base in Rumney, east Cardiff. Three materials cover most of the flat roofs we work on. EPDM rubber is a speciality of ours, and as general guidance an EPDM roof lasts 25 to 30 years or more. GRP fibreglass gives a hard, durable finish and typically lasts 30 to 40 years. Traditional felt is still widely used, though a felt flat roof usually lasts around 10 to 15 years. Each has its place, and the right choice depends on the size of the roof, how it is used and what sits underneath it. As experienced roofers in Cardiff, we will explain the options honestly and recommend what genuinely suits your property, rather than whatever is easiest to sell. Flat roofs tend to fail in a few predictable ways. Cracked surfaces, opened joints, blocked gutters and worn coverings are the usual causes of leaks, and they often show up as a damp patch on an extension ceiling or water in the garage. Where a repair will do, we will repair it. Where the covering has reached the end of its life, replacement with EPDM or GRP is often the longer lasting answer. We work on rear extensions behind the terraces of Roath, Plasnewydd and Grangetown, dormers in Heath and Llanishen, newer homes around Cardiff Bay and garages from Danescourt and Radyr to Pentwyn and Llanedeyrn.
