What is Crazy Time?

At its core, Crazy Time is a live dealer video game show built around an enormous, vertically installed spinning wheel. The game is hosted by an energetic, live speaker who interacts with the audience in real-time. The studio itself is a visual masterpiece-- a dynamic, colorful world that feels part-carnival, part-television video game program set.

Unlike basic table video games, Crazy Time needs no complex techniques or memorization of guidelines. Gamers just position a wager on where they believe the flapper will stop on the wheel. However, the inclusion of a Top Slot above the primary wheel and 4 distinct reward video games includes layers of excitement and unpredictability.

The Anatomy of the Crazy Time Wheel

The 54-segment wheel features numbers and bonus offer rounds. Understanding the layout of the wheel is the primary step for any player aiming to dive into the action.

Wheel Segment Payment/ Function Number of Segments on Wheel **1** Pays 1:1 21 **2** Pays 2:1 13 **5** Pays 5:1 7 **10** Pays 10:1 4 **Coin Flip** Activates Bonus Round 4 **Money Hunt** Activates Bonus Round 2 **Pachinko** Triggers Bonus Round 2 **Crazy Time** Sets Off Bonus Round 1

As seen in the table above, the lower-paying numbers (1 and 2) appear most regularly, while the bonus games are much rarer, making them the ultimate targets for players throughout a session.

The Top Slot Feature

Before every single spin of the main wheel, a two-reel fruit machine positioned directly above the wheel-- referred to as the **Top Slot**-- spins concurrently.

- **Reel 1:** Displays among the wheel sections (a number or a bonus offer game).
- **Reel 2:** Displays a multiplier value (ranging from 2x approximately 50x).

If the sign on the very first reel aligns horizontally with the multiplier on the second reel, that multiplier is applied to the corresponding sector for that spin. If the main wheel arrive on that particular segment, any wins or benefit

round payouts are quickly improved by **Crazy Time** the multiplier. This function can lead to enormous win capacities, specifically when integrated with the video game's high-tier bonus rounds.

Dive Into the Four Crazy Time Bonus Rounds

The piece de resistance of Crazy Time is unquestionably its four bonus rounds. Triggered when the wheel stops on their respective sections, these mini-games transport gamers away from the primary wheel into immersive, interactive enhanced reality worlds.

1. Coin Flip

The most basic of the four bonus offer rounds. A coin with a red side and a blue side is flipped by a mechanical flippers or the speaker.

- Each side is assigned a random multiplier before the flip.
- Players win the multiplier related to whichever color faces up when the coin lands.
- If multipliers are low, a "Rescue Flip" can in some cases be triggered, providing players a 2nd chance at greater worths.

2. Money Hunt

This bonus round is a virtual shooting gallery showed on a massive screen including 108 random multipliers.

- The multipliers are hidden behind different signs (like a cactus, a target, a chef's hat, and so on).
- Players use a crosshair to intend and contend one chosen symbol before the timer goes out.
- Once time expires, the covert multipliers are revealed, and gamers receive the multiplier attached to their picked spot.

3. Pachinko

Motivated by the standard Japanese arcade video game, Pachinko includes a radiant wall filled with pegs.

- The speaker drops a puck from the top of the board.
- The puck bounces arbitrarily down through the pegs until it lands in among the multiplier zones at the bottom.
- If the puck lands on a "DOUBLE" value, all multipliers at the bottom of the board double, and the puck is dropped once again, raising the stakes considerably.

4. Crazy Time

The holy grail of the game. When triggered, the host opens a red door that leads into a vibrant, surreal virtual world including a massive, 64-segment mega wheel.

- Gamers should choose among 3 flappers: **Green**, **Blue**, or **Yellow**.
- The host spins the wheel, and whichever sector the selected flapper points to is the winner.
- Segments consist of multipliers as well as **DOUBLE** and **TRIPLE** worths. If a flapper strikes a double or triple, all multipliers on the wheel are multiplied accordingly, and the wheel spins again. This can cause astronomical payments, capping out at a maximum win of 20,000 x the gamer's stake.
