2. **Buy-In:** Each participant pays the entry fee, which amounts to the cumulative cost of the cases selected for the fight.
3. **The Reveal:** The platform's random number generator (RNG) opens the cases for all gamers round by round in real-time.
4. **The Winner:** At the end of the series, the system tallies the marketplace value of all products won by each individual. The player with the greatest overall value takes home all the products dropped in the fight.
