How Do CS2 Cases Work?

At its core, the CS2 case system is a lotto. Cases do not open themselves; gamers must purchase a particular **Case Key** (generally priced at £ 2.50 GBP in-game) to unlock a case. When opened, the game spins through a roulette of weapon surfaces consisted of in that specific collection and awards one item.

The Weekly Drop System

Gamers do not require to spend cash simply to get cases. Valve rewards active players through the weekly care plan system:

- **Level Up:** Upon earning sufficient XP to rank up their profile for the very first time every week, players receive a care bundle.
- **Choice:** Players are triggered to select 2 out of 4 available benefits, which normally include a mix of weapon skins, graffiti, and crucially, weapon cases.
- **Active vs. Graveyard Drops:** Cases typically fall under two categories: the **Active Drop Pool** (cases currently dropping actively to players) and the **Rare/Discontinued Pool** (older cases that drop at an incredibly low rate of approximately 1%).

Understanding the Odds: What Are the Chances?

Before diving headfirst into opening cases, it is crucial to comprehend the mathematics behind them. Valve notoriously lists the main possibilities for skin wear and rarity tiers.

Rarity Tier Approximate Drop Probability **Mil-Spec (Blue)** ~ 79.92% **Restricted (Purple)** ~ 15.98% **Classified (Pink)** ~ 3.20% **Covert (Red)** ~ 0.64% **Special Item (Knife/ Gloves)** ~ 0.26%

Furthermore, every item dropped includes a specific **Wear Rating** (Float Value), which dictates how scratched or beautiful the skin looks:

- Factory New (FN)
- Minimal Wear (MW)
- Field-Tested (FT)
- Well-Worn (WW)
- Battle-Scarred (BS)

Additionally, there is roughly a **10% chance** that any weapon skin dropped will remain in its **StatTrak™** version, which tracks the variety of kills made with that weapon.
