Today, the industry is dominated by immersive, high-production-value live dealership video games. At the outright apex of this transformation sits **Crazy Time**, a video game show-style casino phenomenon that has recorded the imagination of millions worldwide.

Developed by Evolution Gaming, Crazy Time integrates the mechanics of a cash wheel with interactive benefit rounds, enhanced reality, and huge multiplier capacity. For those curious about the buzz, this detailed guide checks out how the game works, breaks down its reward rounds, and provides tactical insights into this modern classic.

What is Crazy Time?

Released in 2020, Crazy Time is developed on the huge success of earlier live wheel games like *Dream Catcher* and *Monopoly Live*. Set in a lively, Willy Wonka-esque studio, a charming live host spins an enormous, vertical 52-segment wheel.

The core objective is basic: players position bets on the section of the wheel they believe the flapper will arrive on. Nevertheless, what sets Crazy Time apart from basic wheel video games is the addition of a leading slot above the primary wheel and 4 unique, highly immersive reward video games.

The Anatomy of the Wheel

The 52 sectors on the Crazy Time wheel are divided into numbers and benefit round sets off. Understanding the layout is the primary step for any gamer wanting to dive into the action.

Wheel Segment Payout/ Function Number of Segments Likelihood **Number 1** Pays 1:1 21 40.38% **Number 2** Pays 2:1 13 25.00% **Number 5** Pays 5:1 7 13.46% **Number 10** Pays 10:1 4 7.69% **Coin Flip** Triggers Bonus Game 4 7.69% **Cash Hunt** Sets Off Bonus Game 2 3.85% **Pachinko** Triggers Bonus Game 2 3.85% **Crazy Time** Triggers Bonus Game 1 1.92%

The Four Bonus Rounds: Where the Magic Happens

While wagering on numbers supplies stable gameplay, the real excitement-- and the game's massive payment capacity-- lies within the 4 distinct bonus offer rounds. If the wheel stops on a perk sector, players who put a bet on that specific sector get to get involved.

1. Coin Flip

The easiest of the bonus offer rounds, the Coin Flip takes location on a physical digital screen. A coin with a red side and a blue side is flipped by a robotic arm.

- Before the flip, random multipliers are designated to both the red and blue sides.
- Whichever side lands face up wins the multiplier for the participating gamers.
- If the multipliers are low, a "Rescue Flip" can often be set off, providing players a 2nd possibility at greater benefits.

2. Cash Hunt

Step into a virtual shooting gallery including a massive screen filled with 108 random multipliers.

- These multipliers are hidden behind different signs (like a cactus, a target, or a constable's badge).
- Players are offered a minimal time to goal and fire a cannon at their picked sign.
- As soon as time ends, the surprise multiplier behind the selected sign is revealed and used to the gamer's stake.

3. Pachinko

Influenced by the conventional Japanese arcade game, the Pachinko reward round features a big vertical wall filled with physical pegs.

- The host drops a puck from the top of the board.
- As the puck bounces down through the maze of pegs, it ultimately lands in one of the landing zones at the bottom.
- Each zone consists of a multiplier. If the puck arrive on a "DOUBLE" zone, all multipliers on the board double, and the puck is dropped once again for even bigger wins.

4. Crazy Time

The crown jewel of the video game is the Crazy Time reward round. The host opens a red door, leading players into a surreal, brilliantly colored virtual world behind the wall.

- Gamers are faced with an enormous virtual wheel including three flappers (Green, Blue, and Yellow).
- Players select their preferred flapper before the wheel is spun.
- The wheel consists of massive multipliers, "DOUBLE," and "TRIPLE" sections. If a flapper points to a double or triple value, all the multipliers on the wheel increase, and the wheel spins again as much as an optimum cap of 20,000 x.

The Top Slot Feature

Including an extra layer of anticipation to every single spin is the **Top Slot**. Found straight above the primary video game wheel, this tiny two-reel slot spins concurrently with every wheel rotation.

- The left reel picks a random bet spot (a number or a reward video game).
- The right reel picks a random multiplier.
- If the Top Slot successfully matches the winning sector on the primary wheel, the multiplier is used to that spin or sets off an enhanced bonus offer round. This system is what allows players to secure payouts of up to

500,000 x their initial bet.

Tips and Strategies for Playing Crazy Time

While Crazy Time is basically a game of opportunity identified by a physical wheel, players often adopt particular techniques to handle their bankroll and maximize their home entertainment worth.
