Gamers exist with a grid (usually 3x3, 5x5, or bigger) filled with concealed tiles. Behind these tiles lie either multipliers (representing a win) or mines (representing an overall loss of the existing round's stake).

The game is popular primarily since of its transparency and the "Provably Fair" innovation that underpins it. This permits gamers to verify that the result of every round was figured out by a random seed, rather than being controlled by the house.

Core Mechanics

The goal is to secure small revenue margins consistently rather than chasing after a 100x payout.
