2. The Anti-Martingale/ Paroli Strategy (Medium Risk)

- **How it works:** The gamer doubles their bet after every *win* and goes back to the original base bet after a loss.
- **Application in Limbo:** Ideal for riding hot streaks while minimizing exposure throughout cold streaks.
- **The Catch:** Relies totally on stringing consecutive wins together.

3. The Fixed Target Strategy (Controlled Risk)

- **How it works:** The gamer keeps both the bet size and the target multiplier identical for every single round (e.g., always betting £ 5 on a 5.00 x multiplier).
- **Application in Limbo:** This is the most mathematically stress-free way to play. It enables players to compute their expected session period and manage their bankroll efficiently without emotional decision-making.
