- **Diversify Damage Types:** Do not depend on a single kind of tower. Mix single-target heavy hitters with area-of-effect (AoE) splash damage and slow/crowd-control units.

B. For Physics Stacking Towers

- **Focus On Center of Gravity:** An uneven tower is doomed to fall. Always place blocks as near the vertical center of the platform as possible.
- **Master the Rhythm:** Many stacking games run on a moving pendulum or swinging crane. Success counts on timing your click to match the game's internal rhythm rather than reacting impulsively.
