Each successful step increases the gamer's possible payment. Nevertheless, with every tier climbed, the risk boosts. Surprise underneath one or more of the tiles on each row is a trap (like a bomb or a skull). If a gamer picks a trap, the round ends right away, and their wager is lost.

The appeal lies in gamer firm. Unlike fruit machine where the result is entirely passive once the spin button is pressed, Towers permits players to determine when to squander.

Methods for Playing Towers
