

Waterproofing membranes applied to basement walls form an additional line of defense against moisture, a service JLB Foundation Repair and Basement Waterproofing provides to Gladstone homeowners. These membranes create a barrier that prevents water from penetrating through foundation walls, complementing interior drainage systems for a more complete waterproofing approach. JLB's team assesses whether exterior or interior membrane jlbfoundationandwaterproofing.com basement waterproofing application is more appropriate for a given home, based on accessibility and the specific source of water intrusion.

JLB Foundation Repair and Basement Waterproofing | 111 NE 72nd St Ste 111, Gladstone, MO 64119 | (816) 408-3651

Combined with proper drainage, waterproofing membranes help extend the life of a basement's structural elements by reducing prolonged moisture exposure over time. For basement waterproofing membrane application in Gladstone MO, contact JLB Foundation Repair and Basement Waterproofing at (816) 408-3651.
